

- Tall and full Early Group III excels in the I-states region
- Excellent scores against SDS and Frogeye
- "K" gene for Phytophthora Root Rot
- Great choice for limited tillage

Characteristics	
Plant Height	Tall
Plant Width	Medium Bush
Flower	Purple
Hilum	Black
Pubescence	Light Tawny
Pod	Brown
SCN Race	3=VG, 14=A
Phytophthora Root Rot Gene	K

Management Recommendations	
Irrigation	*
No Till	****
Wide Rows	****
Narrow Rows	**
Higher Populations	*
Lower Populations	****
High Organic	**
Clay and Variable	****
Light and Sandy Soils	****

**** = Excellent | *** = Very Good | ** = Good | * = Fair
NR = Not Recommended | DP = Data Pending

Disease Resistance	
Phytophthora Root Rot Field Tolerance	DP
Brown Stem Rot	P
Iron Deficiency	F
White Mold	A
Frogeye	G
Aphid Antibiosis	VG
Sudden Death	E

Agronomics	
Emergence	DP
Reaches Canopy Fast	P
Stress Tolerance	F
Standability	A
Shatter Resistance	G

Notes

E = Excellent | VG = Very Good | G = Good | A = Average | F = Fair | P = Poor | DP = Data Pending

Glyphosate

Tolerant

Bayer®, the Bayer Cross®, Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer. Genuity® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. VPMAXX® is a trademark of Pioneer. VPMAXX® brand seed is distributed by AgVenture Inc. © 2016 AgVenture, Inc. Always follow grain marketing, stewardship practices and pesticide label directions. Varieties that are glyphosate tolerant (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
