

**New**

- New Late Group IV LL/STS® indeterminate release
- Big brawny plant type, handles stress well
- Good resistance to Root Knot nematode
- "K" gene for PRR, good Stem Canker tolerance

| Characteristics            |                        |
|----------------------------|------------------------|
| Plant Height               | <b>Medium Tall</b>     |
| Plant Width                | <b>Bush</b>            |
| Flower                     | <b>Purple</b>          |
| Hilum                      | <b>Imperfect Black</b> |
| Pubescence                 | <b>Gray</b>            |
| Pod                        | <b>Tan</b>             |
| SCN Race                   | <b>3=VG, 14=VG</b>     |
| Phytophthora Root Rot Gene | <b>K</b>               |

| Management Recommendations |      |
|----------------------------|------|

Bayer®, the Bayer Cross®, Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer. Genuity® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. VPMaax® is a trademark of Pioneer. VPMaax® brand seed is distributed by AgVenture Inc. © 2016 AgVenture, Inc. Always follow grain marketing, stewardship practices and pesticide label directions. Varieties that are glyphosate tolerant (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
